---	---	--

Let the following skeleton of an activity with two buttons and an imageView for displaying an image. Clicking the first button displays an image. Clicking the second button displays a toast with a message. Provide the necessary and adequate code for the activity to fulfill functionalities of the buttons.

```

public class NameOfClass extends Activity {
    .....
    .....

    @Override
    public void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.main);

        .....
        .....
    }
}

```

Reminder of the skeleton of the *onClick()* callback method of a listener of a button

```

Button.setOnClickListener(new OnClickListener() {
    @Override
    public void onClick(View v) {
        .....
        .....
    }
});

```
